The following is an explanation of the technical scoresheet.

13.1. Technical Scoresheet – Part I

13.1.1. Clean Working Area at Start-up/Clean Cloths

- A. The cleanliness and organization of the competitor's workstation (worktable, prep table, top of machine) will be evaluated on a scale between 1 and 6. If the area is deemed messy, a 1 will be recorded.
- B. Verify the competitor's ability to organize the working area in a practical and efficient way.
- C. Over preparation should be marked down (e.g., milk in the jugs, etc.)
- D. A minimum of 3 clean cloths should be available when the performance time starts. The cloths must be clean and have a designated purpose (i.e., 1 for the steam wand, 1 for drying/cleaning baskets, and 1 for bar clean up. A towel on the competitor's apron/person for 1 of these uses is included in this count).
- E. If there is any water in the cups on top of the espresso machine at any time, the competitor will receive a score of 0 for "Station management/Clean working area at end."
- F. Competitors may have pucks (used coffee grounds) in the portafilters at the start of their competition time. This will not count against "Clean working area at start-up/Clean cloths."

13.2. Technical Skills Espresso – Part II

Please note the technical skills standards are the same for all 3 beverages. The technical scoresheet is the same in Part II, III

13.3. Flushes the Group Head

Flushing of the group head must occur in the time after removal of the portafilter and prior to each extraction. If the group head was flushed prior to the extraction of the served beverages, the judge will mark “Yes.”

13.4. Dry/Clean Filter Basket Before Dosing

If the filter basket is completely dry and clean prior to the served beverages, the judge will mark “Yes.”

13.5. Acceptable Spill/Waste When Dosing/Grinding

Spill/waste is ground coffee left unused during the competition/performance time that may be found in the espresso grinder’s dosing chamber, in the knock box, on the counter, in the trash, on the floor or elsewhere. Waste created in the process of preparing beverages that are not served to judges does not count towards a competitor’s total waste evaluation. Spill/waste of up to 5 grams of unused coffee per beverage category is considered acceptable. In order to earn a score of excellent 5 or higher, the waste must not exceed 1 gram of unused coffee per beverage category. Wasting more than 5 grams of coffee per beverage category is unacceptable and will result in 0 points. A reasonable amount of coffee purged is not included in waste. All coffee used for drinks must be ground during competitor’s 10 minutes competition time.

13.6. Consistent and Effective Dosing and Tamping

The competitor must demonstrate a consistent method for dosing and tamping. The competitor should evenly distribute the coffee grounds, followed by levelled tamping of adequate pressure. Cultural differences are taken into consideration.

13.7. Cleans Portafilters (Before Insert)

Cleans basket rim and side flanges of portafilter before insert into the machine. If done, the judge will mark “Yes.”

13.8. Insert and Immediate Brew

The competitor should start the extraction immediately after inserting the portafilter into the machine without any delay. If done, the judge will mark “Yes.”

13.9. Extraction Time (Within 3 Second Variance)

Judges will time all shots extracted and determine whether shot extraction times are within a 3.0-second variance. If the extraction time is within a 3.0-second variance of each other within each category of drinks, the judge will mark “Yes.” Extraction time begins when the competitor activates the machine’s brew cycle. Shot times for shots that are not served will not be included in this score.

13.10. Technical Skills Milk Beverage – Part III

Please note the first 7 evaluation areas are the same as under the Espresso Evaluation – Technical Skills.

13.11. Empty/Clean pitcher/jug at Start

The competitor should pour cold, fresh milk into a clean pitcher, which must not have been filled during the preparation time. The pitcher should be clean on both inside and on the outside.

13.12. Purges the Steam Wand Before Steaming

The competitor should purge the steam wand before inserting it into the milk pitcher/jug.

13.13. Cleans the Steam Wand After Steaming

The steam wand should be cleaned with a dedicated steam wand towel.

13.14. Purges the Steam Wand After Steaming

The competitor should purge the steam wand after steaming the milk.

13.15. Acceptable Milk Waste at End

The pitcher/jug should be more or less empty after the milk beverages have been prepared. Acceptable waste is no more than 90ml in total.

13.16. Technical – Part V

13.17. Station Management/Clean Working Area at End

- A. Technical judge will evaluate the competitor’s overall workflow and use of tools, equipment, and accessories.

- B. The competitor should display an understanding of the correct use and operation of the espresso machine.
- C. The competitor should display an understanding of the correct use and operation of the grinder – including the management of coffee in and through the grinder. Competitors should be grinding coffee for each shot or set of shots.
- D. The competitor should try to achieve extraction times within a 3.0 second variance and shot volume of 25-35 ml (30 ml +/- 5 ml).
- E. The technical judge will evaluate the competitor’s workflow throughout the presentation, including: the organization and placement of tools, cups and accessories; the competitor’s movement and flow in and around the workstation; the cleanliness and maintenance of the station (equipment, counters, towels, pitchers); the management of coffee and ingredients (milk, signature beverage ingredients). In the absence of a technical judge, the head judge will evaluate the Station management and cleanliness at the end of the performance/competition time.
- F. Liquids or ingredients must not be placed on top of the machine; otherwise 0 points will be awarded in “Station management/Clean working area at end.”
- G. The cleanliness of the area is evaluated. If a spill occurs, the competitor should have it cleaned up by the end of their performance time. Cleaning while working (e.g., removing spent grounds or wiping tables) will improve the competitor’s score, as will cleaning the station before they end their performance time. All wares and tools (e.g., tampers, cups, trays, pitchers/jugs) are included in this evaluation including items on the espresso machine and worktables. Spent pucks (used coffee grounds) are allowed to be in the portafilters at the end of the performance and are not part of this score.

13.18. Clean Portafilter Spouts

- A. The competitor needs to remove any water or grounds on the portafilter spouts by cleaning the spouts. Rinsing, using a towel, and wiping with fingers are all acceptable methods for achieving clean spouts.

13.19. General Hygiene Throughout Presentation

The judge will determine this score based on the competitor’s sanitary practices throughout their entire presentation. If proper hygiene is used for the entire presentation, the judge will mark “Yes.”

Examples of unacceptable practices include:

- Touching hands to face, mouth, etc. and then using the hands for beverage preparation.
- Touching the floor and then using the hands for beverage preparation.

13.20. Proper Usage of Cloths

The judges will evaluate the correct and sanitary usage of the competitor's cloths. The competitor should use one for the steam wand, one for cleaning the filter basket and one for the workstation.

Examples of unacceptable practices are:

- D. Using a non-dedicated cloth to clean a steam wand (using it for some other purpose other than using it to clean a steam wand.)
- E. Anything that is not sanitary or food safe with a cloth such as: touching it to face, mouth, etc.
- F. Using a cloth once it has touched the floor or dropped.

14. Sensory Evaluation Procedure

Each competitor will be evaluated by 2 official scoring sensory judges and two non scoring guest judges. The following is an explanation of the sensory scoresheet.

14.1. Espresso Evaluation – Part I

- A. Espressos will be evaluated using the following protocol by the two official sensory judges. Sensory judges will complete all steps of the evaluation before recording scores.
- B. Sensory judges will stir the espresso 3 times with a spoon (moving the spoon front to back) to mix the flavors within the shot, then immediately taste. Sensory judges will take at least 2 complete sips to fully evaluate the espresso. Judges will not taste the espresso off the spoon.
- C. Competitors may override the evaluation protocol by giving the judges specific alternative instructions on how they want the espresso evaluated. As long as the instructions are reasonable, and are not in contradiction with other rules, the judges should follow all instructions given by the competitor.

14.2. Crema

Judges will visually evaluate the appearance of the crema for presence in the vessel. To score a “yes” the crema must stretch across the entire surface of the espresso and not have any holes or broken spots.

14.3. Accuracy of Taste Descriptors

Judges will listen to the taste (flavor and aftertaste) descriptions and explanations given by the competitor and compare those with the beverage served. The overall taste profile of the beverage served should support specialty coffee. Any flavor or aftertaste descriptors given by the competitor for their espresso will be taken into consideration under this score. This score is based on how accurately these descriptors match the flavor and aftertaste of the espresso. Taste descriptors must be given or a score of 0 will be received in this category.

14.4. Accuracy of Tactile Descriptors

The judges will listen to the tactile descriptions and explanations given by the competitor and compare those with the thickness and texture of the beverage served. The judges will score how accurately the given description matches the tactile sensation of their espresso. If the experience matches the description, but the tactile experience score is low, high marks cannot be given. If no descriptors are provided, the competitor will receive a 0 for this score.

14.5. Taste Experience

The taste experience of the espresso is evaluated to determine the quality of the beverage. Judges will evaluate the components of the overall taste experience of the espresso across both the espresso’s flavor and aftertaste to determine their quality, how well they fit together, and how well they complement each other. “Flavor” is defined as the combined perception of basic tastes (including sweet, sour, salty, bitter, and umami) and aromatic qualities. “Aftertaste” is defined as the combined sensation of basic tastes and aromatic qualities that remain after coffee has left the mouth (either by swallowing or spitting). Both the taste components of the extraction and the coffee itself are evaluated.

If one or more of the taste components detracts from the flavor experience of the espresso (e.g., sour, acrid) the aftertaste of the espresso (e.g., “astringent”), lower marks are given. If the taste component contributes positively to the overall taste experience, higher marks are given.

If the espresso is unbalanced (lacking in a certain taste component in a way that detracts from the overall positive experience or if a taste component is overpowering the beverage), the experience score is reduced.

Note: Accuracy of taste description is not taken into consideration for this score.

14.6. Tactile Experience

The quality of the tactile experience, or mouthfeel, is evaluated. Judges will evaluate the tactile sensation of coffee in the mouth, based on the thickness and texture of the espresso served. The espresso should have a tactile experience that correlates to the preparation, method of extraction, and coffee used in the espresso.

“Thickness” relates to the perceived weight or viscosity of the espresso, from thin to thick. Texture is defined as the perceived sensation of grittiness to smoothness (e.g., “watery,” “tea-like,” “velvety”). The quality of thickness and texture is based upon the tactile feeling of the espresso in the mouth. Both a light and heavy weight can receive high scores relative to the texture quality in the mouth. If the weight and/or texture detracts from the espresso experience (e.g., “watery,” “rough,” or “dusty”), lower marks are given. If the perception of weight and texture contribute positively to the experience of the espresso, higher marks are given.

14.7. Milk Beverage Evaluation – Part II

- G. Milk beverages will be evaluated using the following protocol by the two scoring sensory judges. It is important that sensory judges follow this protocol consistently. Sensory judges will complete all steps of the evaluation before recording scores.
- H. Sensory judges will first evaluate the appearance of the milk beverage. Next, they will take an initial sip from anywhere on the rim of the cup. After the initial sip, the sensory judges will revisit the milk beverage for at least 1 additional sip from an undisturbed location on the rim of the cup.
- I. Competitors may override the evaluation protocol by giving the judges specific alternative instructions on how they want the milk beverage evaluated. If the instructions are reasonable, and are not in contradiction with other rules, the judges should follow all instructions given by the competitor.

14.8. Visual Appeal

Judges will evaluate the appearance of the milk beverage to determine its visual score. On the surface, the milk beverage should have a color combination of milk and coffee, with good color contrast definition, balance in the cup, symmetrical design and a smooth, and possibly glossy/glass-like sheen.

It is not acceptable for milk beverages to be topped with any additional spices and/or powders. Doing so will result in a 0 in the “Taste Experience” category.

14.9. Accuracy of Taste Descriptors

Judges will listen to the taste (flavor and aftertaste) descriptions and explanations given by the competitor and compare those with the beverage served. This score is based on how accurately these descriptors match the taste experience of the milk beverage. Taste descriptors must be given or a score of 0 will be received in this category.

14.10. Taste Experience

The milk beverage is a beverage consisting of 1 espresso and steamed milk served at a temperature that is immediately consumable. The texture and temperature of the beverage, and the taste of the coffee and milk will be included in the taste experience evaluation. The milk beverage should have a harmonious balance of the sweetness of the milk and its espresso base. The taste profile (flavor and aftertaste) of the beverage served should support specialty coffee, with a balance created by the addition of milk.

15. Barista Evaluation – Part IV

15.1. Attention to Details/All Accessories Available

All accessories should be readily available, and the working area should be well and purposefully organized. Everything should have its own place and purpose. Judges should look for the competitor to have back-up cups and accessories in case of mistakes or spills. Refilling of judges’ water glasses also demonstrates attention to detail. The espresso must be served with a spoon, napkin, and unflavored water. If the competitor instructs the judges to drink the espresso without the use of a spoon, the espresso must be served with a napkin and unflavored water.

15.2. Presentation

Presentation is evaluated based on the presentation skills of the barista and the concept of the performance. Judges look for originality in concept, methods, techniques, and ingredients used. Judges consider (allowing for culture and personality differences) points such as natural, clear, and concise communication, as well as the ability to manage workflow and time. Good customer service skills (e.g., politeness, accuracy, attentiveness, eye contact, etc.) will also be taken into consideration.

15.3. Coffee Knowledge & proper use of equipment and space

This category includes evaluating the observed qualities relevant to the barista profession, such as technique, preparation, and demonstrating the wider understanding of coffee beyond the preparation of the 8 drinks served. Wider coffee knowledge includes the process of coffee cultivation, roasting and preparation from seed to cup as well as an implicit understanding of the correct use of the equipment. Judges will look for a strong correlation between what is explained and what is delivered. The competitor must demonstrate that they are a coffee professional who has command over their presentation and coffee.

15.4. Judges' Total Impression – Part V

The “Total impression” score is meant to capture the composite impression of the performance in its entirety. The judge should consider how the concept was supported by the barista and the delivery of their presentation; how the two courses complimented/highlighted the concept. Some sample guiding questions are included below.

For example: Did the performance inspire a deeper connection to coffee? Did the barista’s performance illuminate a part of the systems map in a unique way? Did their performance provoke new thoughts about specialty coffee? Was the experience immersive, thought-provoking, or otherwise important to specialty coffee? Was the performance insightful and inspiring? How positive was the composite experience of the beverages and content delivery to the judge? Did the performance celebrate the craft of coffee? The judge should feel free to use the entirety of the scoring scale, based on their own impression of the performance in its entirety.

16. Appeals

16.1. Judge Related Issues

Most scorekeeping questions will be answered during competitor debrief. If a competitor objects to the scores given by one or more judges, the competitor can meet with their head judge during the competitor debriefing to explain their protest. If the head judge is unavailable, the competitor may discuss with the Event Director onsite. If the issue is not solved, the competitor may protest in writing to NZSCA (see Appeals below). This will be reviewed by judge leadership and the NZSA Competitions Committee. They will make a decision on-site and a representative of NZSCA Competitions Committee will inform the competitor of the decision.

If in the unlikely event that the head judge or any other NZBC personnel discovers or suspects potential dishonest behavior by a judge during a competitor's evaluation, then the following will apply:

- The head judge will request the return of all applicable scoresheets from the score keeper.
- The head judge will meet with the judge(s) and the Competition Committee to evaluate the situation.
- The Staff and Competitions Committee will then rule upon the matter in a closed meeting.

16.2. Competitor Related Issues

If a competitor has an issue or protest to make during the competition, the competitor should contact the event organizer. The event organizer will then determine whether the issue can be resolved on-site, or whether the issue will require a written appeal following the event.

If the event organizer decides that the issue and/or protest can be solved on-site the event organizer will contact the involved party or parties to ensure fair representation. The competitor's issue and/or protest will be discussed, and a decision will be made jointly, on-site by the event organizer. The event organizer will inform the competitor of the decision.

16.3. Appeals

If a person does not agree with a decision, they may appeal the decision in writing to the NZSCA Competitions Committee. All decisions made by the committee are final.

The appeal letter must include the following:

- Name
- Date
- A clear and concise statement of the complaint
- Date and time references (if applicable)
- Comments and suggested solution
- Party/Parties involved
- Contact information

Any written protests/appeals omitting this information will not be considered. All persons must submit their written complaint or appeal to the NZSCA events director via email emma@nz sca.org within 24 hours of the incident.
